ADEE is dedicated to:

- Promoting the advancement and foster convergence towards higher standards of dental education across Europe
- Sharing experiences and intellectual resources
- Promoting the development of assessment & examination methods
- Promoting and helping co-ordinate peer review and quality assurance in dental education
- Promoting exchange of staff, students & programmes
- Disseminating of knowledge and understanding in dental education

ADEE's role:

To provide a **European link** with other bodies concerned with education, particularly dental education

act as a **hub** that provides an interface for its members to meet and connect with each other and with other professional bodies

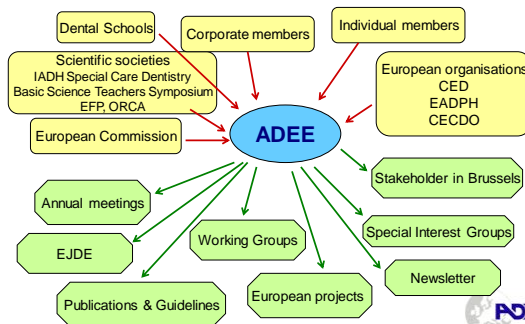

Through:

- exchange
- creative collaborations
- connections

ADEE's role:

ADEE's European activities:

- DentEd projects
- DentCPD project
- Implant Workshop
- ORCA Workshop
- EFP Workshop
- Oral Health Platform
- Re-evaluation of Professional Qualifications Directive

ADEE's European activities:

- DentEd projects

1997-2000

2000-2003

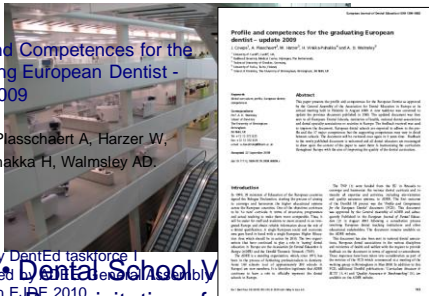

2004-2007

■ DentEd projects

- Profile and Competences for the Graduating European Dentist - update 2009

Cowpe J, Plasschaert A, Harzer W, Vinkka-Puhakka H, Walmsley AD.

- Prepared by DentEd taskforce I and approved by ADEE General Assembly
- Published in EJDPE 2010

Peer visitations following a self assessment process

■ DentEd projects

Domains **Introduction**

- Professionalism
- Interpersonal, Communication and Social Skills
- The new graduate is required to safely undertake the independent Knowledge Base, Information and Information literacy
- Practice of dentistry, Education and training programmes differ greatly between old EU countries and newly joined countries and access to higher education in the EU. It is hoped that the Major competences document will contribute to further harmonisation and convergence of dental education in Europe.

A major competence is the ability of a dentist on graduation to perform or supervise a particular or complex service or task.

Supporting competences

The more specific abilities could be considered as subdivisions of a 'major competence' and are termed a 'supporting competence'.

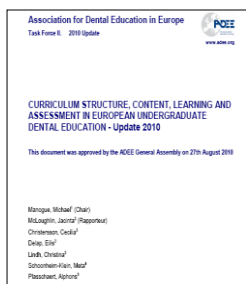

ADEE envisages that all European schools will adhere to the major competences as described in this document, but that supporting competences may vary in detail between schools.

■ DentEd projects

- Curriculum structure & European Credit Transfer system (ECTS) - update 2010

• Prepared by DentEd taskforce II and approved by ADEE General Assembly 2010

■ DentCPD project

New project focused in Lifelong Learning EU funded (2010-2012) [European Convergence of Dental Schools in Dental CPD]

"Harmonization & Standardization of European Dental Schools' Programs of Continuing Professional Development for Graduate Dentists"
